

Project Scheduler (m/f/d) – Germany

Düsseldorf, North Rhine Westphalia

Full-time

Eavor Technologies Inc. is seeking a high performing self-motivated **Project Scheduler**. Employed by Eavor GmbH in Germany and working within a multidisciplinary international team you will use your operational and technical expertise, initiative, business acumen, and problem-solving skills to construct the world's first closed-loop geothermal systems. The successful candidate's primary focus will be on our project developments in the city of Geretsried, Bavaria and shall be ready for future projects assignments within Germany. There is ample potential for career growth in our rapidly expanding technology start-up.

Eavor is seeking a candidate with a technical background and experience in developing, maintaining and overseeing schedules for energy projects.

Eavor provides a competitive compensation package with upside opportunity.

Please send resume and cover letter in a single PDF to careers-germany@eavor.com with the subject line Project Scheduler.

Roles and Responsibilities

- Scheduling and forecast for the execution of projects for heat and/or power generation, consisting of civil infrastructure works, balance of plant, power distribution system, drilling, automation and power plant.
- Support to review critical path, cost loading, schedule content, use of relationship and lag, constraints and milestones.
- Provide schedule analysis and metrics to key stakeholders on a regular basis.
- Lead review meetings to review schedules and define optimization potential.
- Support planning for procurement and tender processes
- Work closely with the project development team to develop and maintain schedules and resource planning for multiple projects.

You will work with the project leadership team to perform scenario analysis and provide data to enable decisions such as:

- Defining an appropriate work breakdown structure in line with the adopted project development and project delivery strategy
- How to monitor and control the project through the various phases of the project lifecycle
- How to manage the interface between the various contracts
- Completion dates of any project's portions
- Maximizing efficiency of the project strategy with respect to cost, time and contingency
- Risk and opportunity management.
- Participate in the development of standards to support the functional groups in successful delivery of projects.

Qualifications

- Bachelor's Degree or equivalent
- 3+ years of experience in project scheduling is ideal
- High degree of initiative, assertiveness, problem-solving skills and willingness to learn
- Flexibility and willingness to travel to construction sites.
- Excellent communication abilities.
- Experience in project planning/scheduling within projects of industrial scale

- Proficiency with scheduling software, with a strong preference placed on MS Project, and/or Primavera P6;
- Certification received through Oracle, PMI or other similar organizations focused on is considered as an asset
- Recognition of expertise in project management is considered as an asset
- Requires strong software skills to include Microsoft Excel, Microsoft Project and database applications.
- Ability for multi project management and interdisciplinary task management

About Eavor Technologies Inc.

Eavor (pronounced “Ever”) is a private company founded in 2017 to develop and commercialize disruptive geothermal technology. We mobilize cutting edge oil and gas technology, along with some proprietary solutions, to create the world’s first closed-loop geothermal system. Eavor has successfully built a prototype demonstration facility (“Eavor-Lite”) in Alberta along with our partners. Working with clients and partners, we are progressing a pipeline of commercial projects in Germany, other parts of Europe, the Middle East, Africa, Asia, Australasia and North America.
